Academic Opportunities

UCLA offers an astonishing breadth of academic opportunities. With more than 125 majors and 3,900 courses to choose from, you can create the education you want. Choose to take multiple majors, or tailor a major with one of our 90+ minors. Our leading-edge curriculum goes way beyond the expected format.

SMALL, INTERACTIVE CLASSES

Our class sizes are more compact so that you can work closely with our amazing faculty and get to know other students. To that end, two out of three of our undergraduate classes have less than 30 students. Even smaller are about 200 seminars called *Fiat Lux* (Let There Be Light), each with an intriguing topic and only 10–20 students.

INTERDISCIPLINARY PROGRAMS

For academic disciplines combined in innovative ways, consider interdepartmental majors like global studies or environmental science. Or neuroscience — it's taught by medical school and life sciences faculty, an exciting collaboration. Our general education Clusters are a year-long series of classes with a unifying theme and are taught by an interdisciplinary team. Each student becomes part of a small learning community.

ORIGINAL RESEARCH Over half of our students graduate with research experience, in the humanities as well as social sciences, engineering and laboratory sciences. You can pursue your own research interests or work alongside faculty, do field research or explore library treasures. Some undergraduates even publish in academic journals.

CAPSTONE PROGRAMS Seniors can demonstrate what they've learned over the last four years in exciting programs that include writing, service and other projects. Your results are then shared with the public — a class, conference, even a competition judged by professionals. So, lecture. Lead a seminar. Even dance! This is your chance to shine.

INTERNSHIPS We're located in Los Angeles, home of Hollywood and Silicon Beach. So you can intern at major high-tech and entertainment companies as well as government and community organizations. Our Career Center can help you find great opportunities. Talk to a counselor, schedule a mock interview or get a *résumé critique*.

STUDY ABROAD Do amazing academic work in state-of-the-art labs, rainforests, urban settings and marine reefs. Experience different cultures and explore natural wonders. Summer travel study or education abroad will expand your worldview — and UCLA offers 100+ programs in more than 40 countries.

Renowned Faculty

Pulitzer Prize winners. MacArthur Fellows. National Medal of Science recipients. Members of the National Academies. Educators and life changers. Our faculty members are the foremost experts in their fields. When the world has problems, it comes to us.

The caliber of their work is reflected not only in journal citations, TED talks and awards but also in the average of \$1 billion of research funding UCLA receives each year. Our research produces world-changing innovations, from medical devices that aid stroke victims to nanoparticle water filters and low-cost solar panels as thin and pliable as a plastic bag.
